sd-LDL

**CPT Code:** 83722  
**Order Code:** 1341  
**ABN Requirement:** No  
**Synonyms:** Small Dense LDL; Small Dense Low-density Lipoprotein; sdLDL  
**Specimen:** Serum  
**Volume:** 0.5 mL  
**Minimum Volume:** 0.2 mL  
**Container:** Gel-barrier tube (SST, Tiger Top)

**Collection:**

1. Collect and label sample according to standard protocols.  
2. Gently invert tube 5 times immediately after draw. DO NOT SHAKE.  
3. Allow blood to clot 30 minutes.  
4. Centrifuge for 10 minutes.

**Special Instructions:** At least 3 ml of blood should be drawn.

**Patient Preparation:** Fasting may be required for this test. Please ask your doctor if you should fast prior to testing.

**Transport:** Store serum at 2°C to 8°C after collection and ship the same day per packaging instructions provided with the Cleveland HeartLab shipping box.

**Stability:**

- **Ambient (15-25°C):** not acceptable  
- **Refrigerated (2-8°C):** 5 days  
- **Frozen (-20°C):** not acceptable  
- **Deep Frozen (-70°C):** >5 days

**Causes for Rejection:** Specimens other than serum; improper labeling; samples not stored properly; samples older than stability limits

**Methodology:** Immunoturbidimetric

**Turn Around Time:** 1 to 3 days
Relative risk:

Intended Use: The small dense LDL test can be used to determine cardiovascular risk in individuals with metabolic syndrome or established/progressing coronary artery disease, individuals with triglyceride levels between 70 and 140 mg/dL, as well as individuals with a diet high in trans-fat or carbohydrates.

Limitations: Drawing less than 3 ml of blood in a tiger-top serum separator tube (SST) may cause erroneous results.

Additional Information: The small dense form of LDL (sdLDL) cholesterol carries a three-fold increased risk of myocardial infarction compared to large LDL cholesterol.
